EDUCATION

Tecnológico de Monterrey | Mexico City, Mexico

Computer Technology Engineering, August 2022 - Present

EXPERIENCE

Freelance Backend Developer | LiftU

May 2021 - Jul 2021

- Designed and implemented a scalable PostgreSQL database for a job portal web application.
- Developed an authentication system using Django, implementing secure registration, login, and password management functionalities.
- Utilized the Django templating system to create more than 30 dynamic HTML pages for the website.
- Used Javascript to implement real time search and filter functionality for the jobs and companies.

Freelance Web Developer | Whatsapp Masivo

Feb 2022 - May 2022

- Utilized Webflow, HTML, and CSS principles to construct a responsive UI for a SaaS website.
- Leveraged Webflow's CMS and e-commerce functionalities to create various pricing plans for the product, enabling easy management and customization of pricing options.

Freelance Website Auditor | Multiple Businesses

Oct 2022 - Jun 2023

- Optimized conversion rates and SEO for more than 10 different websites.
- Conducted comprehensive website audits, identifying areas for improvement in terms of user experience, page load speed, and mobile responsiveness.

PROJECTS

E-commerce Web Application (React, Django, PostgreSQL)

Dec 2021 - Jan 2022

[🌐 Demo](#) | [GitHub](#)

- Implemented functionality for filtering, searching, and sorting products in real-time using React.
- Built a complete JWT authentication system with the Django REST Framework and React.
- Added a payment gateway using the PayPal API for processing order payments securely.
- Designed and integrated a PostgreSQL database to manage the data of all users, products, categories, and orders.

Streaming Service Model (C++)

Mar 2023 - Jun 2023

[GitHub](#)

- Developed a C++ based streaming service terminal application that allows users to browse, filter and search through a collection of movies and series, leveraging CSV files for data storage.
- Utilized object-oriented programming principles to structure and model the entire program

SKILLS

- **Programming Languages:** Javascript, Python, HTML, CSS, Typescript, C++, C.
- **Technologies and Frameworks:** React, Django, Next, Tailwind, Node, Express, GitHub, Postman.
